Academic employment

2017 - present Postdoctoral researcher – Department of Culture Studies, Tilburg School of Humanities, University of Tilburg.

I work on my Veni project ‘Is it me or my disorder? Authenticity in psychiatry’, and in prof. Jenny Slatman’s Vici-project ‘Mind the body: Re-thinking embodiment in health care’.

2015 - 2017 Postdoctoral researcher – The Berlin School of Mind and Brain, Humboldt University.

I assessed the logic and limits of the neuro-reductionist idea that psychiatric disorders are brain diseases, and elaborate an alternative view on the relation between mind and brain and the causality involved.

2011-2014 Researcher – Department of Psychiatry, Academic Medical Center, University of Amsterdam.

I investigated the phenomenology of Obsessive-Compulsive Disorder (OCD), and interviewed OCD patients who were treated with Deep Brain Stimulation to examine its effects on patients’ experiences and life world.

2010 Visiting Scholar – Center for Subjectivity Research, University of Copenhagen.

2007-2011 Fellow Marie Curie EU Research Training Network DISCOS (Disorders and Coherence of the Embodied Self) - Department of Psychiatry, Section Phenomenological Psychopathology, Heidelberg University.

I interviewed schizophrenic patients using the EASE (Examination of Anomalous Self-Experience) instrument, and investigated the role of the body in the phenomenology of schizophrenia.
